GYMIX Gym

SaaS Platform

Empowering fitness centers with smart cloud management and AI.

Cloud-native operations

MULTI-TENANT ARCHITECTURE · AI AUTOMATION · GAMIFICATION

BUILT FOR LOCAL GYMS READY TO GROW

Paper trackers and legacy desktop tools is not reliable to to
Save Data .

01 **Manual operations . Slow**

Manual Management: Heavy reliance on paper logs, Excel sheets, or outdated desktop apps..

02 **Revenue leaks · Lost**

Lost income due to missed subscription renewals and poor payment tracking.

03 **Trainer time disappears · Tangled**

Scheduling, client follow-up, and workout planning compete for every hour.

04 **Need One connected platform · Unified**

Admins, trainers, and members share booking, renewal alerts, and actionable data.

IN GYMIX We Can handle all of it :

0Ĉ Automated Operations · Fast

Cloud Automation: Replacing paper and legacy apps with a secure, 100% cloud-based system accessible from anywhere, ensuring zero data loss.

02 Revenue Protection · Secured

Smart Tracking: Automated subscription renewal alerts and digital payment logs to completely eliminate lost income.

03 AI-Powered Efficiency · Streamlined

Trainer Hub & AI: An AI Workout Assistant and digital dashboard that saves trainers hours of manual planning and client follow-up.

04 Unified Experience · Connected

One Ecosystem: A centralized platform where Admins, Trainers, and Members interact in real-time for bookings and progress tracking.

Market Competitors & Core Features

Headline: Who Are the Competitors & What Do They Offer?

1. Global Players (Mindbody, PushPress, Glofox)

Key Features:

→Advanced automated billing and financial forecasting.
→Complex class and slot scheduling systems.
→Branded mobile apps & wearable device integration.

2. Local & Regional Players (Alnzam, GymFlow, Legacy Desktop Software)

Key Features:

→Arabic language support (RTL).
→Basic membership accounting and receipt printing.
→Barcode / QR code check-in at reception.

Competitor Drawbacks We Solve:

Global Flaws: High USD pricing (~$100+/mo), lack of Arabic support, and over-complicated setups for local SMBs.

Local Flaws: Tied to a single desktop PC (high data loss risk), outdated UI, and zero mobile tools for trainers or members.

Two USPs built to slash churn and save trainer time

USP 01

AI Workout Assistant

Generates custom workout bases for each client. Trainers Trainers start from a relevant plan, then apply their expertise expertise instead of rebuilding routine programming.

MORE COACHING TIME

USP 02

Gamification System

Loyalty points and rewards make attendance visible and and repeatable. Members have a reason to return, while while gyms gain an engagement lever against churn.

STRONGER RETENTION LOOP

Main Feature

Modern Multi-Tenant Cloud SaaS

Affordable EGP pricing, 100% Arabic/English support, accessible anywhere with zero hardware lock-in.

Three Buyers, One Platform

Targeting the Core Egyptian Fitness Ecosystem

01 | SMB Gym Owners

Target: Independent commercial gyms looking for affordable, modern cloud management.
Key Need: Stopping revenue loss and automating member subscription renewals.
Platform Value: Centralized financial tracking, automated renewal alerts, and local payment proof approvals.

02 | Boutique Fitness Studios

Target: CrossFit boxes, Yoga hubs, and specialized Pilates studios.
Key Need: Seamless class scheduling and slot capacity management.
Platform Value: Real-time mobile class booking, attendance limits, and automated waiting lists.

03 | Freelance Personal Trainers

Target: Independent PTs managing personal clients in-person or online.
Key Need: Saving time on workout routine design and client progress follow-up.
Platform Value: AI Workout Assistant to generate customized plans in seconds and track client progress.

GYMIX Monetization & Pricing Tiers

Headline:B2B SaaS Business Model: Flexible & Localized Revenue

Target Customer: Gym Owners (B2B Monthly Subscriptions)

1. Subscription Tiers (Monthly Recurring Revenue - MRR)

Basic Tier (299 EGP / month)

Target: Small studios / single-room gyms (Up to 150 members).
Includes: Core member tracking, attendance check-in, subscription expiry alerts.

Pro Tier (599 EGP / month)

Target: Growing mid-sized gyms (Up to 500 members).
Includes: Basic Tier + Trainer management, attendance reports, financial logs.

Business Tier (999 EGP / month)

Target: Large fitness centres & multi-branch facilities.
Includes: Unlimited members, advanced analytics, multi-branch management.

2. Special Annual Enterprise Offer (Upfront Cash Flow)

Annual VIP Plan: 9,999 EGP / year *(Discounted from 12,000 EGP — Save ~17%)*
Strategic Value:

- Locks in 12-month client commitment (Zero Churn for 1 year).
- Provides instant capital for cloud infrastructure and development.
- Includes **Free System Setup & Data Migration**

2. Additional Revenue Streams

One-Time Setup Fee: Onboarding service for data migration, system configuration, and staff training.

Paid Add-On Features: WhatsApp automated notifications, AI Workout/Diet plan generators, and advanced financial forecasting.

Payment Gateway Commission: Percentage-based fee on online member renewals

Lean Execution: MVP to Full Scale

Headline: Go-to-Market Strategy: Building a Lean MVP First

Phase 1: Minimum Viable Product (MVP - Launch Scope)

→**Core Member Operations:** Member registration, subscription tracking, and instant QR check-in.

→**Automated Renewal Alerts:** Expiry notifications to prevent lost revenue.

→**Financial Tracking:** Basic admin payment logs and quick daily/monthly dashboard.

→**Role Management:** Simple staff and trainer permission controls.

Phase 2: Product Scaling (Post-Launch Expansion)

→**Client Feedback Loop:** Refine features based on real feedback from initial partner gyms.

→**Advanced Add-Ons Integration:** Roll out the AI Workout Assistant, WhatsApp API, and Gamification reward system as premium upgrades.

Technical Architecture

Headline: Technical Architecture & Infrastructure

Core Backend: ASP.NET Core Web API (C#) delivering fast, scalable endpoints.

Database Architecture: SQL Server utilizing logical multi-tenancy (GymId foreign key isolation for tenant security).

Frontend Experience: Modern responsive web application supporting Admin, Trainer, and Member views.

DevOps & Version Control: Git & GitHub for source control, Figma for UI/UX prototyping, and automated cloud backups.

Project Timeline & Roadmap

Headline: Development Roadmap & Project Management

Phase 1: Architecture & Database Design (Weeks 1-2)

SQL Server schema creation with GymId isolation.
ASP.NET Core API foundation & authentication setup.

Phase 2: Core MVP Features (Weeks 3-4)

Admin dashboard, member registration, and instant QR check-in.
Subscription renewal tracking and basic financial logs.

Phase 3: Integration & Testing (Weeks 5-6)

Frontend integration based on Figma prototypes.
Security testing, tenant data separation validation, and bug fixes.

Phase 4: Post-Launch Upgrades (Future Phase)

Integrating the AI Workout Assistant, WhatsApp API, and Gamification engine

GYMIX Project Execution Roadmap
خارطة طريق تنفيذ مشروع GYMIX

Weeks 1-2

Architecture & DB Design
المعمارية وتصميم قاعدة البيانات

- SQL Server schema with GymId isolation, ASP.NET ASP.NET Core API foundation & authentication setup.

Weeks 3-4

Core MVP Features
ميزات MVP الأساسية

- Admin dashboard, member registration, instant QR check-in, subscription renewal tracking, basic financial logs.

Weeks 5-6

Frontend & Testing
الواجهة الأمامية والاختبار

- Modern Web Client (Admin, Trainer, Member views) based on Figma, QA, security testing, tenant data isolation validation, bug fixes.

Project Completion

Launch & Handover
الإطلاق والتسليم

- Final Launch preparation GitHub release, Completion, Handover.

Post-Launch

Post-Launch Upgrades
ترقيات ما بعد الإطلاق

- Future integration of AI Workout Assistant, WhatsApp API, and Gamification engine.
